EXPERIENCE

Software Engineer

Wells Fargo - JUL 2022 - Present, Chandler, AZ

- Architected enterprise-grade Oracle APEX applications for foundational bank assets and internal web platforms in a highly regulated banking environment, supporting risk management, audit and compliance initiatives to deliver critical internal tools and executive dashboards tailored to stakeholder needs.
- Led implementation of automated CI/CD pipelines using Jenkins, GitHub, and UrbanCode Deploy for deployments across testing platforms. Collaborated with release managers and engineers to standardize deployment workflows.
- Partnered with stakeholders to sunset legacy systems and centralize functionality within modern APEX & Cloud applications, redesigning workflows, interfaces, and logic to better meet evolving business and regulatory needs.
- Mentored junior and senior engineers through structured onboarding, hands-on training and pair programming focused on APEX and Cloud deployment tooling, Git versioning, and SDLC review workflows.

Lead Software Engineer

inXsol LLC - FEB 2022 - JUL 2022, Phoenix, AZ

- Led cross-functional execution as lead engineer and acting project manager for multiple concurrent projects, including a firefighter/first responder training simulation and e-learning platform. Coordinated Agile sprints, backlog grooming, and delivery timelines across a globally distributed engineering team.
- Designed and implemented AI/ML speech-to-text transcription models to process real-time firefighter radio communication in high noise, high stress simulation environments, achieving targeted functional accuracy using Python, AI/ML Principles, APIs, and NLP libraries for NIEH funded projects.
- Collaborated with public safety SMEs, technical leaders and key stakeholders to translate high-level requirements into technical implementation plans, ensuring development met both instructional objectives and regulatory standards.

Junior Software Engineer

inXsol LLC - AUG 2021 - FEB 2022, Phoenix, AZ

- Developed and maintained seven full-stack web applications using React.js, .NET (C#), JavaScript, and Oracle/MySQL to support public sector training, enterprise web applications and SAAS platforms for Fortune 500 clients.
- Led troubleshooting and performance optimization by diagnosing technical issues, refactoring service logic, and rewriting inefficient SQL queries.

EDUCATION

Bachelor of Science, Computer Science, Arizona State University

August 2020 - December 2023, Tempe, Arizona

SKILLS AND ABILITIES

- **Programming Languages & Frameworks:** JAVA, C++, Python, .NET, C#, JavaScript, TypeScript, Angular, React.js, SQL, HTML/CSS, Object-Oriented Programming
- **Web Development:** Distributed Systems, Web Applications, Microservices, RESTful APIs
- **Databases:** SQL, PL/SQL, Scripting, MySQL, MSSQL
- **Testing:** Unit Testing, System Integration Testing
- **Cloud & DevOps:** Azure, Oracle Cloud, CI/CD Pipelines, Jenkins, GitHub, UrbanCode Deploy
- **Project Management:** Agile & Scrum Leadership, Sprint Planning, Resource Allocation
- **Security & Compliance:** Secure Coding Practices, Risk Controls, SDLC Compliance
